

GF Piping Systems

+GF+ URECON

Fast, easy, clean pipe insulation

A new way to field insulate piping

PUR-SplitTube™

PUR-SplitTube™

Applications

- Freeze prevention for plastic and metal pipe systems
- Ideal for direct bury installations
- HVAC chilled or warm water
- District heating and cooling
- Industrial process
- Food processing
- Chemical feed
- Municipal

Introducing PUR-SplitTube™

Super fast installation using “hinged” jacket and peel-away closure.

PUR-SplitTube Key Features

PUR-SplitTube is pipe insulation that’s quickly and easily installed in the field utilizing 6.2m (20-foot) long polyurethane shells with a hinged polyethylene jacket. Pipe joints and fittings with field modified PUR-SplitTube or fabricated kits. PUR-SplitTube can be applied to direct buried pipe systems ranging from 25 mm to 350 mm (1” to 14”). PUR-SplitTube is ideal for virtually any pipe material.

Speed of installation

PUR-SplitTube is a simple clam shell system that installs far quicker than comparable systems as a result of the hinged jacket and peel-away closure design.

Fast delivery to site

PUR-SplitTube can be shipped to the site in a number of days (not weeks).

Installation value

PUR-SplitTube is constructed of high quality, light weight polyurethane foam providing maximum insulation value, high compressive strength, and closed cell construction to provide moisture resistance.

Very few seams

PUR-SplitTube has fewer seams than conventional mechanical clam shell type systems, resulting in a tighter overall system with less thermal bleed.

All the benefits of polyurethane foam

- Max insulation value
- High compressives
- Closed cell construction
- Few seams relative to conventional mechanical insulation shells resulting in water tight system with less heat loss/gain overall.
- Lightweight and easy to ship.
- Applications up to 93°C (200°F)
- Electric heat tracing also available

PUR-SplitTube™
