GF Urecon Pre-insulated Pipe

ABOUT

From the Arctic Circle to Antarctica, GF Urecon is the name synonymous with superior quality and guaranteed void free pre-insulated piping systems. Our systems are manufactured to meet the most rigid quality standards required for projects exposed to extreme climates. These identical stringent standards are applied to the piping systems produced for the more benign latitudes of the Caribbean and those in between; thus ensuring a level of quality unsurpassed in the industry.

GF Urecon has been factory insulating pipe with polyurethane foam using the patented U.I.P.[®] process since 1973 in Quebec and 1981 in the Calmar, Alberta, facility. The U.I.P.[®] system may be applied to virtually any size and type of core pipe with or without heat trace conduit(s). A full range of outer jackets is available for the product line to suit almost every application. We are currently operational in our new state of the art facility in Quebec, Canada, as well as our modernized facility in Alberta, Canada.

Experts in our Field

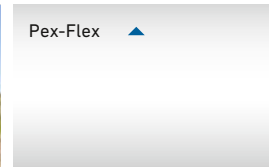

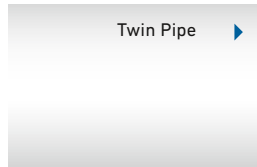

Nearly 50 years of World Class product and design experience with extreme climates, heat tracing and district energy.

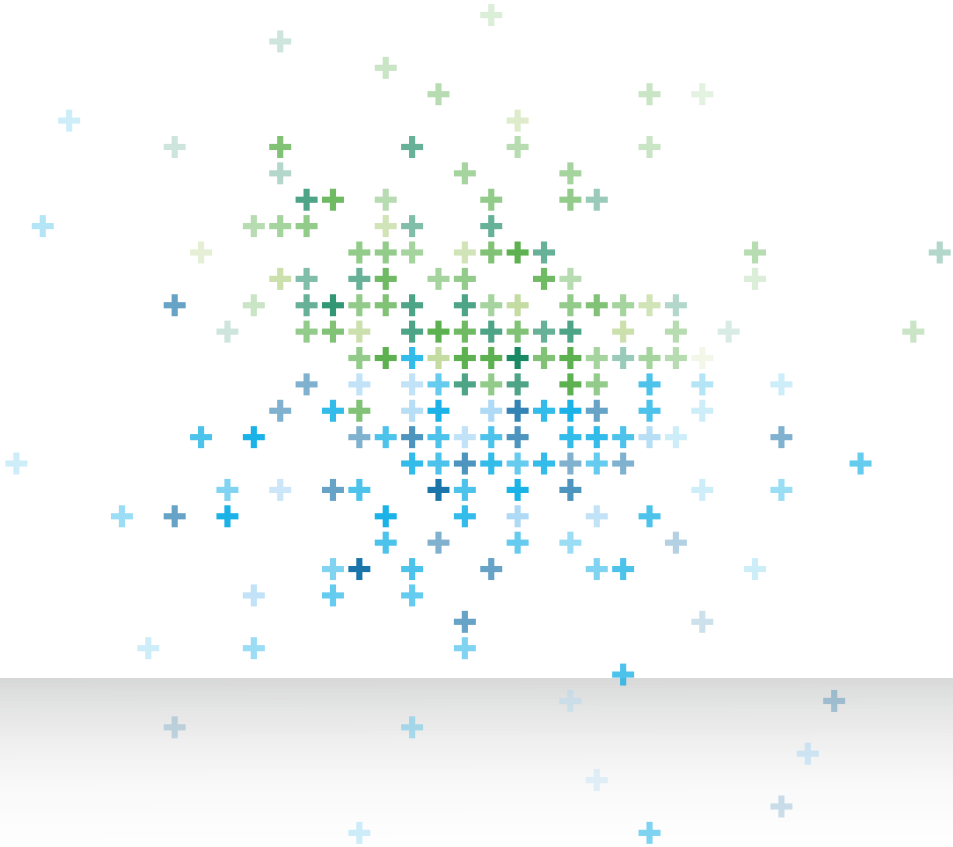

Quality Products

ISO 9001 certified since 1997.
Comprehensive supply chain qualification process and thorough internal quality control processes.

Customer Service

Excellent Customer Service and Sales Team composed of dedicated and experienced personnel.

GF Urecon pre-insulated pipe is...

Banff, AB Brics

- ▶ Industrial / oil & gas
